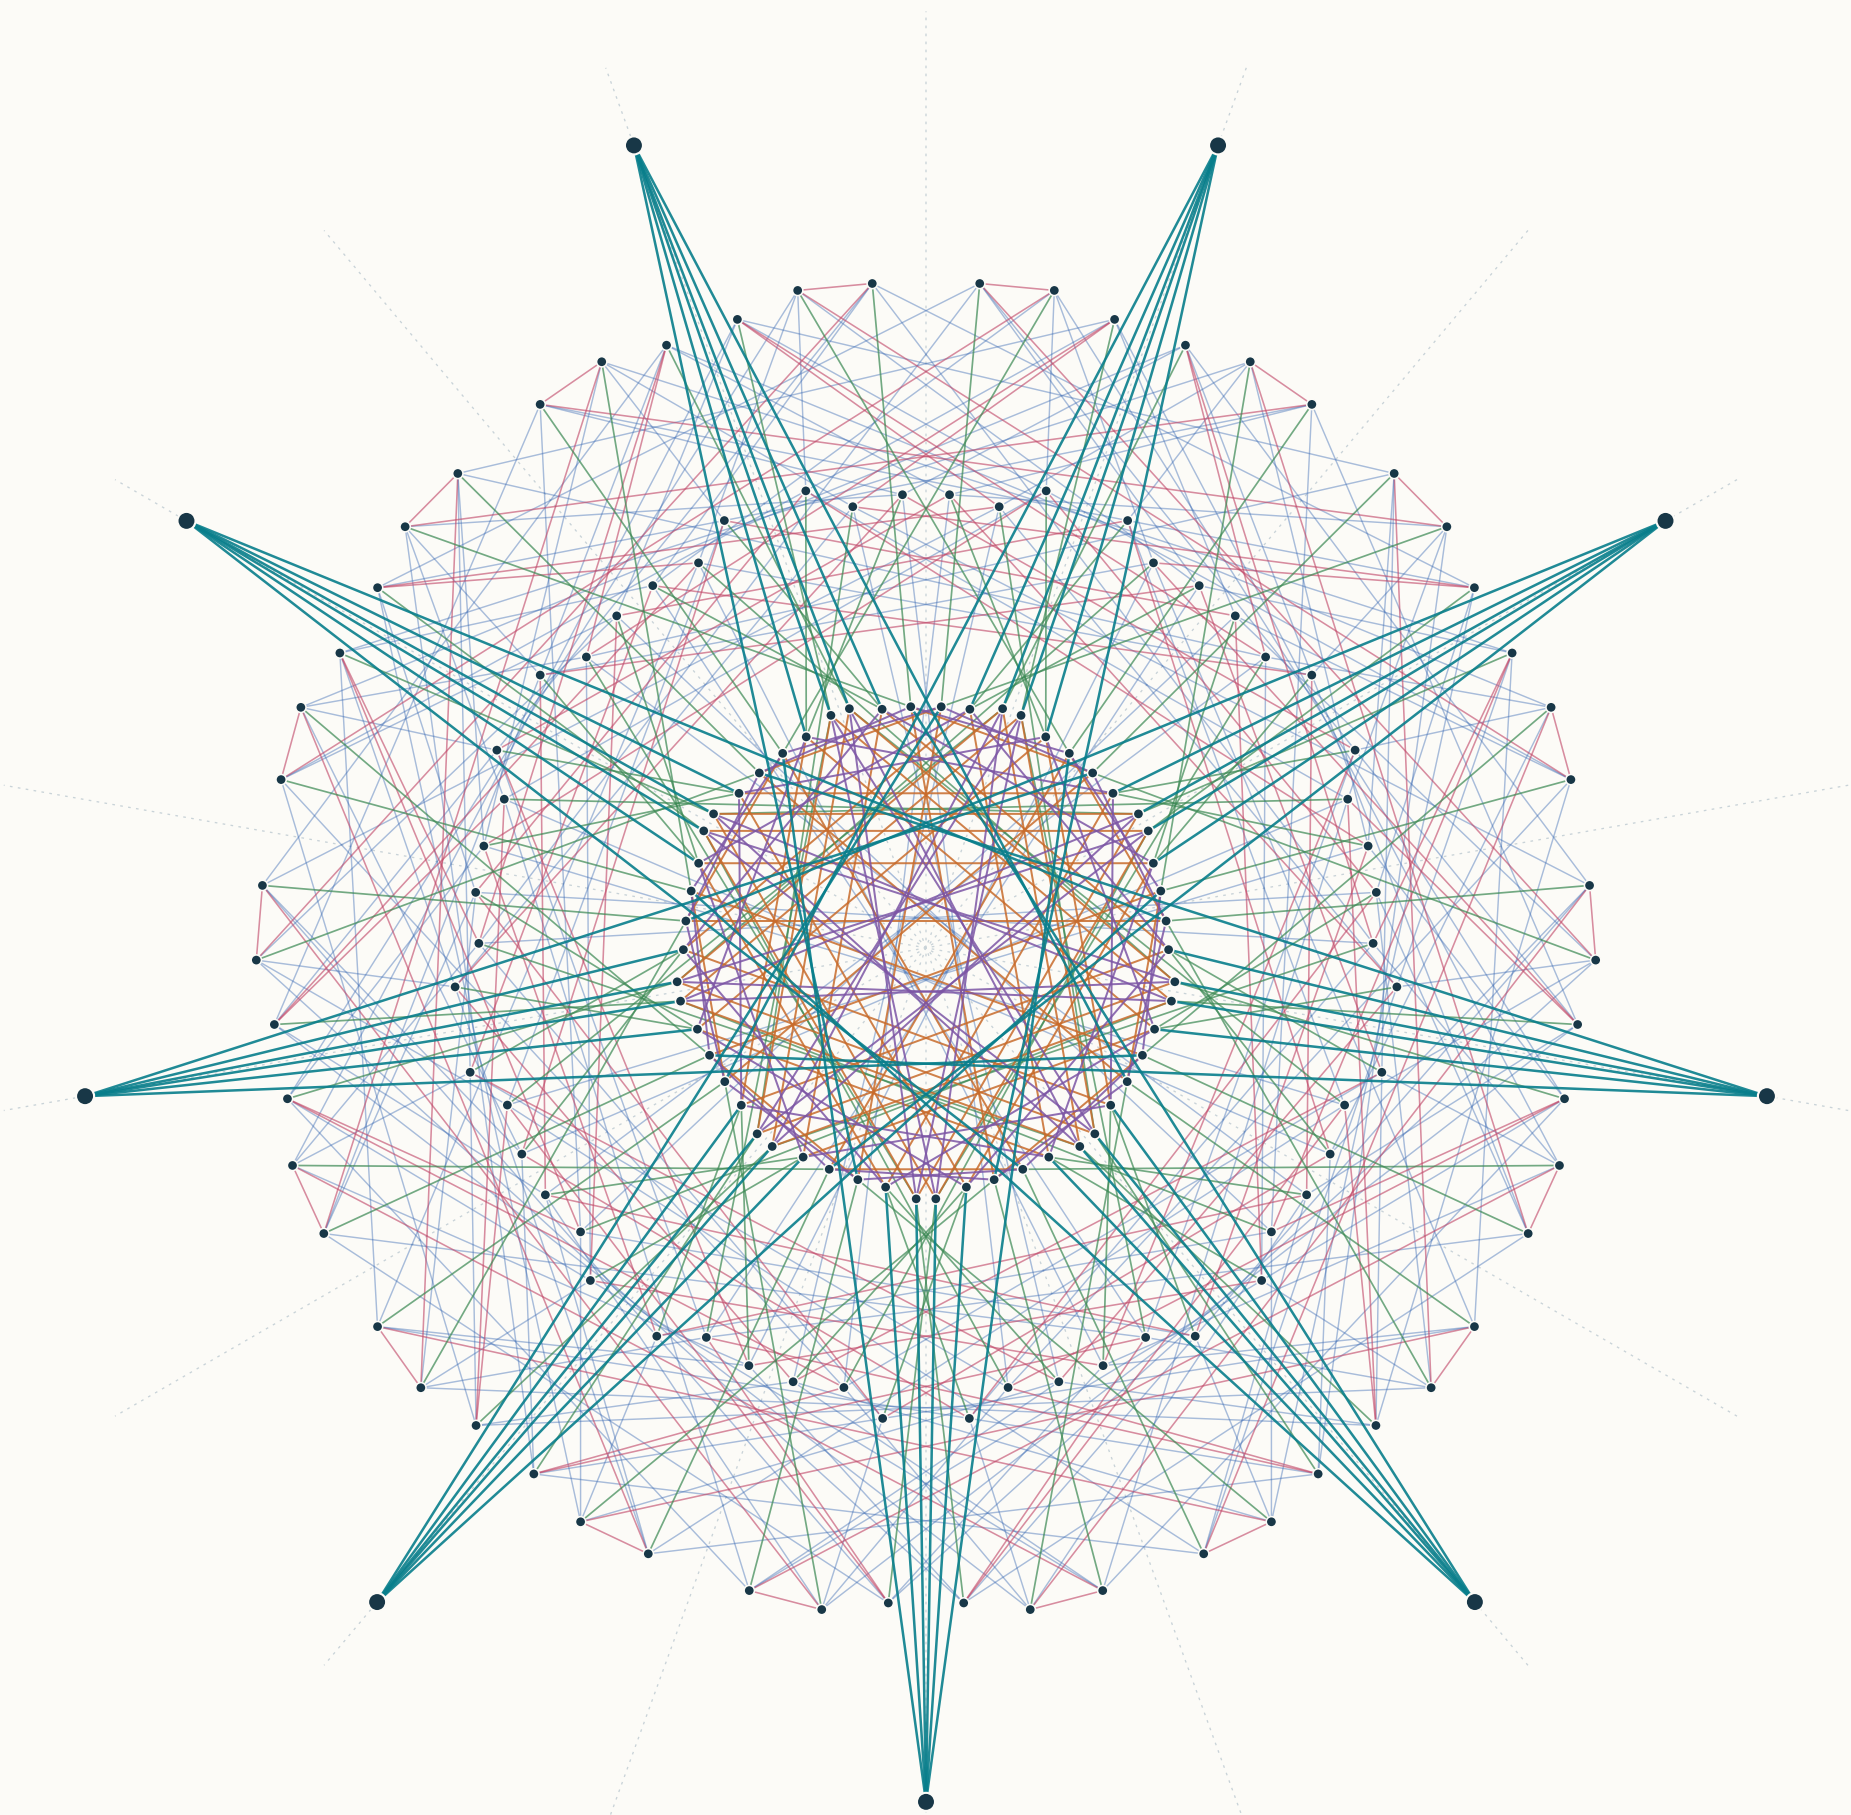
171 vertices · maximum degree 7 · diameter 3

dihedral symmetry D_9 / 19 fibres of 9 vertices over a 19-vertex base graph



hub – spoke (54)
spoke pairs (voltages 3, 6) (54)
spoke loops (54)
spoke – core (108)
core double edges (108)
core – core (216)

Aut(G) has order 216 • $(u, x) \mapsto (u, x + 1)$ is the rotation by 40°

All 594 edges are drawn. Crossings without dots are not vertices. The nine star tips are the hub fibre, the only vertices of degree 6.
