The Z_9 voltage graph behind the 171 vertices

Node u stands for the fibre $\{(u,x) : x \in \mathbb{Z}_9\}$. An arrow $u \to v$ with label a means $(u,x) \sim (v, x+a)$; a loop with label $\pm a$ means $(u,x) \sim (u, x \pm a)$.

(arrow u → v, u < v; voltage)

1→5 8	3→4 4	5→12 5
1→6 5	3→8 4	6→7 2
1→8 7	3→10 2	6→8 8
1→12 7	3→11 8	6→11 4
2→4 1	4→9 7	7→11 8
2→7 2	4→11 7	7→12 5
2→9 5	5→9 1	8→10 1
2→12 1	5→10 2	9→10 4

Hub 0 (degree 6), spokes 13–18, core 1–12. Each spoke meets one core double edge. All 66 base edges are shown; thin blue lines are the 24 core edges listed on the right.
